

# ROCKLAND RESOURCES ANNOUNCES GOLD SAMPLING RESULTS UP TO 145 G/T GOLD AT COLE GOLD MINE PROPERTY, RED LAKE MINING DISTRICT

## APPOINTS DANAЕ VOORMEIJ AS CHIEF GEOLOGIST

**November 26, 2025, Vancouver, British Columbia** – Rockland Resources Ltd. (CSE:RKL) (OTCQB:BERLF) (FSE:GB2) (“**Rockland**” or the “**Company**”) is very pleased to announce initial results of up to 145 g/t gold from its recent sampling program (see PR dated September 30, 2025) at its 100%-owned Cole Gold Mine Property (the “Property”) located in the world-class Red Lake Gold Mining District in Northwestern Ontario. Rockland further announces the appointment of Ms Danae Voormeij as Chief Geologist.

Summary:

- Results from Fall field prospecting program returns 111 g/t and 145 g/t Au from vein grabs.
- Appointment of Danae Voormeij, PGeo, as Chief Geologist.
- Plans for 2026 include drilling and trenching programs.

Partial results from the Fall 2025 prospecting program at the Property returned gold assays by fire assay of up to 111 g/t Au and 145 g/t Au, respectively, for grab sampling of veins.

Fieldwork conducted during the 2025 season including prospecting and sampling for a total of 37 rock and vein samples, with 22 back from the lab now (see Table 1 below) – the remaining 15 samples will be reported on once received.

*Table 1 Gold assay results and descriptions for 2025 field grab samples that returned greater than 1.0 g/t Au. The bonanza gold grades are by gravimetric analysis.*

Sample ID	Description	Gold Grade*
489969	Quartz vein grab sample from outcrop with massive pyrite, chalcopyrite, pyrrhotite and visible gold.	145.0
489968	Quartz vein grab sample from outcrop showing pyrite, chalcopyrite, pyrrhotite and visible gold.	111.0
489859	Quartz vein grab sample with massive pyrrhotite and chalcopyrite.	2.44
489860	Quartz vein grab sample with minor disseminated pyrite and biotite.	1.40

\*Cautionary disclaimer: Grab sampling is selective and may not be representative of the true mineralization.

New Appointment of Chief Geologist:

Rockland further announces the appointment of Danae Voormeij, PGeo as Chief Geologist. Ms. Voormeij is an exploration geologist with over twenty years of hands-on experience exploring for gold and copper in Africa, South Pacific and the Americas. She led the geological team that discovered a multi-million gold deposit at Dugbe, in Liberia, West Africa, for AIM-listed Hummingbird Resources, and she is a board member with Miata Metals and with Sky Gold Corp.

“I would like to express how grateful we are to have Ms. Voormeij join the Rockland team. Her knowledge and experience in orogenic gold systems is an invaluable asset for us, as is her geological modelling expertise,” stated Mike England, CEO of Rockland. “We look forward to advancing our Cole Gold Mines story together as we head into 2026.”

#### Multiple Vein Targets on the Property:

Fieldwork conducted during the 2025 season, including prospecting and sampling, combined with database compilation for the Property, has identified multiple, visible-gold-bearing vein targets on the Property, in addition to the vein system at the Cole Gold Mine.

Figure 1 shows the location of the 2025 sampling of a quartz vein identified as vein 20, located about 1 km to the southwest of the Cole Mine, which returned 111 and 145 g/t Au. The controlling structures for gold mineralization are (1) lithological contact with the ultramafic rocks to the south and east, and (2) northeast trending strike slip faults.

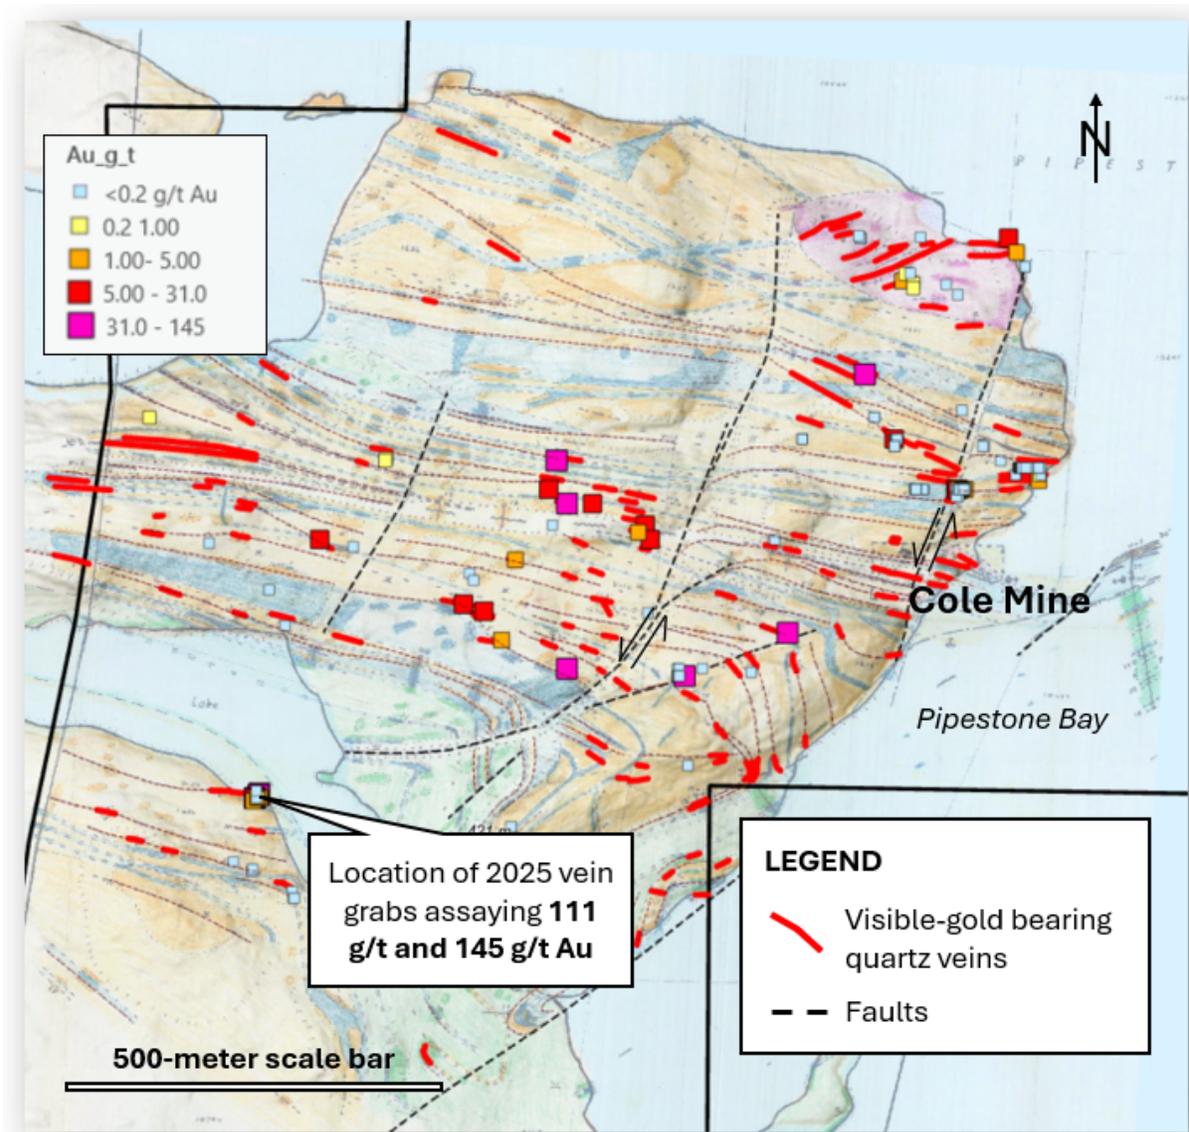

Figure 1 plan view showing location of 2025 grab samples. Multiple visible-gold-bearing quartz veins have been

identified on the Cole Gold Property.

**Up Next:**

- **Gold assay results for 15 surface grabs from October 2025 field program**
- **Early 2026: Drilling program to drill test and verify the 3D-modelled gold-vein system at the Cole Gold Mine to a vertical depth of 400m**
- **Next field season: strip and channel sample the multiple gold bearing veins identified on the Property**

Rockland further announces it has set 275,000 options to directors, officers and consultants of the Company at a price of \$0.08 for a period of 3 years in accordance with the Company's stock option plan.

**Qualified Person:**

Rockland's disclosure of a technical or scientific nature in this news release were reviewed and approved by Danae Voormeij, P. Geo., who is a registered professional geoscientist with Engineers and Geoscientists British Columbia (EGBC) since 2007. Ms. Voormeij serves as the Qualified Person under the definition of National Instrument 43-101 as well as Rockland Resources newly appointed Chief Geologist.

**About Rockland Resources Ltd.:**

Rockland Resources is committed to unlocking value through focused mineral exploration and discovery. Our portfolio includes the historic **Cole Gold Mine Project** in the world-class Red Lake Gold district of Ontario. By leveraging geological expertise, disciplined exploration, and strategic project development, Rockland Resources aims to deliver meaningful growth and long-term value to its shareholders.

**On Behalf of the Board of Directors**

Michael England, CEO & Director
